The Bread Lab | Washington State University

As the family kitchen transforms into a bread lab, Iris is surprised that bread needs only four ingredients—flour, water, salt and starter. She also learns about the invisible microbes that make the dough rise, and how flour comes from wheat grown by farmers.

Bread Lab!: Binczewski, Kim, Econopouly, Bethany, Choi ...

As the family kitchen transforms into a bread lab, Iris is surprised that bread needs only four ingredients—flour, water, salt and starter. She also learns about the invisible microbes that make the dough rise, and how flour comes from wheat grown by farmers. It all seems magical, but it's really science.

Bread Lab! — Readers To Eaters

The Bread Lab is designed for testing and developing products and techniques for the craft baker. WSU Mount Vernon is run by the College of Agriculture. The Bread Lab functions within the plant breeding & grains program, and is a place for bakers to interact with other bakers, scientists, farmers, and millers.

The Bread Lab | King Arthur Baking

How do we in The Bread Lab define whole grain bread? The answer is simple. The answer is simple. Whole grain bread is made with flour in which the whole kernel goes into the mill and the whole kernel comes out of the mill (in flour form).

Unsifted | The Bread Lab | Washington State University

But Jones, a professor at Washington State University who runs a research program called The Bread Lab, doesn't find any of those answers satisfying. * Instead, he's breeding new varieties of wheat, and pushing consumers to expect more of their loaves—more nutrition, more flavor, and more variety.
