## **BS 7608 Code**

BS 7608 is a code of practice for the design of steel structures and covers the general aspects of fatigue design of fabricated steel elements. It is for mechanical engineers. BS 7608 is being revised to bring it up-to-date with Eurocode 3. Since national standards covering the same subject matter as the

of steel products” gives methods for assessing the fatigue life of parts of steel products that are subjected to repeated fluctuations of stress. It is applicable to a large number of industrial fields. The codes includes the standard stress concepts and also defines different Finite Element modelling techniques for the fatigue assessment.
