Self-winding or self-winding automatic watches may need a little help to get started. Once their gears are in motion, however, they use the kinetic motion of your body to stay wound. As long as you wear the watch regularly, you won't have to perform any extra maintenance or winding to get it moving.

How to Start Self Winding Watches | Our Everyday Life

An automatic watch, also known as self-winding watch or simply automatic, is a mechanical watch in which the natural motion of the wearer provides energy to wind the mainspring, making manual winding unnecessary. It is distinguished from a manual watch in that a manual watch, likewise having no internal battery, must have its mainspring wound by hand at regular intervals.
