Denso Hp2 Fuel Injection Pump

The fuel injection system comprises a Fuel Injection Pump, Injection Nozzles, a Fuel Filter, and a Fuel Tank. The fuel that is drawn from the fuel tanks by the Feed Pump is filtered through the Fuel Filter, and is delivered to the injection Pump. The fuel that is delivered to the Injection Pump is pressurized into a highly compressed state, and is delivered via the Injection Steel Pipe to the ...

SERVICE MANUAL

From inline pumps to modern high pressure common rail, fuel systems on diesel engines evolved a great deal over the last century. The advanced fuel injection technologies used on today's diesel engines operate at extremely high pressure with very tight tolerances; only genuine components, tested and certified to OE specifications, can ensure long-lasting performance.

Fuel System | D&W Diesel

An injector is mounted on each cylinder of the engine and the high-pressure fuel from the supply pump is distributed to each injector by the common rail. Diesel Pioneers At the forefront of Diesel
