As of 2017, the EI rate is 1.63 percent. To calculate how much to withhold from your employee's paycheque, multiply their payment by 0.0163. For example, if your employee's pay is \$1,000, his EI premium is \$16.30. You also have to remit a payment to the Canada Revenue Agency on behalf of your employee.

I know with EI the ratio
of nitrate to phosphate
is approx. 10:1,
however after a few
weeks it stabilises at
2:1. Could that be the
imbalance referred?
