jQuery Mobile API Documentation

A Boolean indicating whether to place the animation in the effects queue. If false, the animation will begin immediately. As of jQuery 1.7, the queue option can also accept a string, in which case the animation is added to the queue represented by that string.When a custom queue name is used the animation does not automatically start; you must call .dequeue("queueName") to start it.

.animate() | jQuery API Documentation

As of jQuery 1.9.0 (and unless using the jQuery Migrate plugin), jQuery() requires the HTML string to start with a < (i.e text nodes cannot appear at the front of the HTML string). As of jQuery 1.4, the second argument to jQuery() can accept a plain object consisting of a superset of the properties that can be passed to the .attr() method.
